## **Helical Gear boxes, & Material handling equipment spares**

- Elecon Engineering was established in 1951 in Goregaon, Mumbai by Ishwarbhai B. Patel. The company's early focus was on Engineering, Procurement and Construction projects in India. It initially manufactured custom manufacturing conveyor systems. The company was registered as a Private Limited company on 11 January 1960. In May 1960, the company moved to its current location in Vallabh Vidyanagar, Gujarat. Later, the company was listed on the Bombay Stock Exchange and the National Stock Exchange.

In 1976, the company established its Gear Systems Division, specializing in power transmission equipment. It designs and manufactures worm drives, helical gears, spiral bevel gears as well as a range of couplings. Its products target a range of industries, including steel rolling mills, wind turbines, marine applications and space applications.

Elecon Engineering Company Limited is an Indian company specializing in the manufacture of industrial equipment. Elecon is one of the largest Asian manufacturer of material handling equipment, industrial gear systems and mining equipment.

**Sandvik** is an engineering group in tooling, materials technology, mining and construction. Global surface and underground drill rig manufacturer, Sandvik Mining has now officially launched the first of its new series of rotary and DTH blasthole drills with the

propelled, crawler-mounted blasthole drill that is automation-ready and features forward-thinking design and technology for bulk mining operations. It is designed to withstand the harshest conditions and equipped for rotary or down-the-hole (DTH) drilling.

## Special Industrial bearings

Timken is a global leader in friction management technologies and provides one of the most complete offerings of antifriction bearings in the industry.

### **Standards**

Timken manufactures to global standards. Therefore, products made in any Timken facility in any country are identical. Likewise, the same standard is expected from suppliers who provide products and services to any of the Timken facilities or distribution centers.

Timken is a global leader in friction management technologies and provides one of the most complete offerings of antifriction bearings in the industry.

### **Product List**

Find the right bearings for your application. Timken offers all types of antifriction bearings, bearing kits, and advanced products such as housed units, integrated bearing assemblies and precision assemblies.

### **Services**

Enhance bearing performance through a wide range of Timken services, including remanufacture and repair, reliability services and training.

### **Interactive Engineering Tools**

Also includes tools for determining bearing tolerances, periodic frequencies and interchange for housed units.

## Oil lubricants, fluid engineering solutions

VALVOLINE™ IS A LEADING GLOBAL PRODUCER, DISTRIBUTOR AND BRAND OF HIGH QUALITY LUBRICANTS AND SPECIALIZED AUTOMOTIVE, RACING, COMMERCIAL AND INDUSTRIAL SOLUTIONS. VALVOLINE PRODUCTS, SERVICES AND PROGRAMS RESULT FROM OUR ONGOING COMMITMENT TO IMPROVE MAINTENANCE, ADD PERFORMANCE AND REDUCE OWNERSHIP COST FOR VEHICLE OWNERS AND BUSINESSES.

Metal Cutting Tools for Milling , Drilling, Wide Range of Solid carbide Drills, Hi performance carbide ,threading inserts

The WIDIA story, well-known in Europe, is a new one for many North American manufacturers. Established in Germany in 1929, WIDIA possesses a rich heritage as one of the first innovators in developing tungsten carbide for use as a cutting-tool material. WIDIA also claims the world's first patent for coating indexable inserts and developing the world's first coated grades. The WIDIA name comes from the German phrase 'hart wie diamant,' or 'hard as a diamond' and is as synonymous in Europe with carbide cutting tools as Ferrari is to high-performance automobiles.

Strong brands with niche applications will become significantly stronger and have global impact being tied to the WIDIA brand in the WIDIA Products Group. For example, Greenfield Tap & Die was founded in the late 1800s and has grown to be one of the world's most comprehensive line of premium-quality taps. Leveraged with the recognition and resources of WIDIA and known as WIDIA-GTD™, these taps will continue to grow and find new users worldwide. The same can be said for WIDIA-Clapp/DiCo™, the first choice in PCD/CBN custom metalcutting solutions, or WIDIA-Rübig™, for unsurpassed solid-carbide drilling and reaming.

WIDIA manufactures cutting tools for solid end milling, holemaking, indexable milling, tapping, and turning applications, and tooling systems.

CUTTING TOOLS FOR SOLID END MILLING, HOLEMAKING, INDEXABLE MILLING, TAPPING, AND TURNING APPLICATIONS, AND TOOLING SYSTEMS. METAL CUTTING PRODUCTS
